Professional Certifications and Licensure Crosswalk

WGTC will evaluate and may award credit for recognized proficiencies that equate to specific courses offered at their institutions through certifications and licensure.

A crosswalk of major certifications and licensure and course credit by exemption are listed on the following pages. The certification listed meets or exceeds credit for the corresponding course(s) listed. Students may receive pre-approved credit for certifications and licensure, without completing a portfolio. However, official documentation of licensure/certification may be required. Contact the PLA Coordinator for more information.
